mango wood vase

**FLUTE 13x76-SS101**  
mango wood vase

**CYLTU 13x77-SS101**  
mango wood vase

As handmade and natural items, sizes, weights, carvings, colors and painted designs may vary. In order to show each vase best, each photograph uses its own scale, so sizes should not be compared directly.

Please use the full model number when ordering. The model number shows the **series** (ALABAS describes the shape), the **size** (9x70 shows widest diameter x height in cm), **characteristics** (NS101, indicates painted in "natural look" brown, no embellishments number 101): ALABAS 9x70-NS101; **colors** as above, or specified: black, light brown, dark brown, maroon, natural, painted "natural look" brown, custom colors in matte and gloss.

Our artisans also create custom shapes, customise carvings, paintings and embellishments.

Mango wood vases are made from the agro-industrial mango fruit tree and their manufacture does not damage tropical forests. Mango wood is a natural and agriculturally renewable resource.

Your purchase creates work for artisans in northern Thailand. We believe that your purchase, sale and end customer ownership of these vases indicate socially responsible entrepreneurship and consumerism.
