mango wood vase

As handmade and natural items, sizes, weights, carvings, colors and painted designs may vary. In order to show each vase best, each photograph uses its own scale, so sizes should not be compared visually.

Please use the full model number when ordering. The model number shows the **series** (HAWOL describes the shape), the **size** (13x36 shows widest diameter x height in cm), **characteristics** (PS101 indicates painted without embellishments number 101): HAWOL 13x36-PS101; **colors** as above, or specified: black, light brown, dark brown, maroon, natural, painted "natural look" brown, custom colors in matte and gloss.

Our artisans also create custom shapes, customise carvings, paintings and embellishments.

Mango wood vases are made from the agro-industrial mango fruit tree and their manufacture does not damage tropical forests. Mango wood is a natural and agriculturally renewable resource.

Your purchase creates work for artisans in northern Thailand. We believe that your purchase, sale and end customer ownership of these vases indicate socially responsible entrepreneurship and consumerism.
